

Project Purpose:

Construction of the project will reduce traffic congestion on State Route 41 , improve traffic flow, and capacity, which will increase safety for motorist. Interchange and mainline improvements will allow continued growth. This will link Fresno's economic corridor , which includes governmental complexes, banking, health services and commerce centers in northeast Fresno.

Description:

This project is located in the City of Fresno on State Route 41, from Herndon Avenue undercrossing to north of Friant Road undercrossing. This project will consist of constructing an auxiliary lane and other operational improvements along State Route 41 between Herndon Avenue and Friant Road, and will improve ramps at the Friant Road Interchange. The existing Friant Road off-ramp will be widened to accommodate the auxiliary lanes and to add left and right turn lanes onto Friant Road.

Construction Cost: \$11.8 million

Construction Begins: Winter 2004

Completion Date: Winter 2006

Funding Sources:

Traffic Congestion Relief Program (TCRP)

Agency Responsibilities:

Caltrans: Design, Planning, Right of Way acquisition, Construction Management.
